PASTEURIZED ICE CREAM

FOR PALESTINE SOMETHING MODERN! What Is It?

The purest milk contains many thousand bacteria, and the cream from this milk contains more as they come to the top with the cream. By heating milk or cream to a point somewhat under boiling (155 degmees) most of these germs are killed, and ALL of those that produce disease are thus destroyed. This is the famous process known as PASTEURIZING, without injuring the quality of the milk by boiling. During the coming season THE PALESTINE CREAMERY will furnish to the public PASTEUR-

IZED ICE CREAM delivered to any part of town. We have installed at great expense a PASTEUR-IZING machine, and you can now get a CITY GRADE cream in your own town, thoroughly PASTEUR-IZED and absolutely PURE and free from GERMS.

Our ice cream is manufactured in an expensive FREEZER MACHINE and does not touch human hands from the time the milk is pasteurized until it is scaled in the can ready for delivery. PURITY

U. S. GOVERNMENT STANDARD is the grade supplied, this being specified by the government as containing 13 per cent butter fat by analysis, and the proper proportion for perfect cream. With our modern mixing equipment we GUARANTEE this amount of cream in OUR ENTIRE OUTPUT-we have
